

Getting to the Root of Acne!

WHAT EXACTLY IS ACNE?

Bacteria causes acne (P.acnes) and grows at the root of hair follicles deep inside your skin. Sebaceous glands become inflamed or infected and blemishes occur. You must kill the bacteria to clear acne.

Note About Hormones:

Adult acne is often hormonal, so I do encourage you to use progesterone crème if you are experiencing female adult acne.

To Treat & Prevent Acne

1. Glycolic Acid is a great starting point. It unclogs pores and minimizes their appearance. It clarifies and penetrates to keep skin clear and glowing. For acne prone skin, start with Glycolic Acid. It can reduce scarring & prevent future acne. Rejuvenate T.R. is our Glycolic Acid product.
2. Benzoyl Peroxide (BP) is key for anyone with mild to severe/chronic acne. The BP molecule penetrates deep and kills acne where it starts. BP is the "gold standard" for treating acne. The Vivant line by James Fulton, M.D. has been the most effective acne line that we have ever seen.
3. An acne toner (Normalizing Tonic) is valuable as it clears skin of contaminants and prepares the skin for other acne treatments to work more efficiently.

Tackling acne

. . . . Its not that hard

BASICS: My favorite basic & economical products for acne are Rejuvenate T.R. (with Glycolic acid & Vitamin A) and Buffing Pearls Cleanser. Your face will GLOW! Acne will have a difficult time re-occurring. This may be all you need.

AGGRESSIVE TREATMENT:

For a more aggressive regimen, I carry the products by Dr. James Fulton, America's leading acne Doctor and co-inventor of Retin-A (the leading prescription acne product). Dr. Fulton became a dermatologist because he had horrible acne in his youth & dedicated his career to helping others like you. His products are a little more expensive, but they are very effective.

"I cannot put into words, the miracle your products are for my face. Since I was 16 I couldn't go out without makeup and when I was wearing makeup, my face still looked bad. I don't want to remember those days. I has no self-confidence and really bad acne, I was not happy. I didn't want to go out or talk to people. I tried everything in the world. I spent so much money, but now FINALLY here I am with beautiful skin. Its clean & shiny and every morning when I go to wash my face I cry. I thank God for this miracle. Thanks Dr. Barbara for giving me new life." -N.S., CA
